ENERGY PARTNERS

Company Overview

Regency Energy Partners LP (NYSE: "RGP") is a Master Limited Partnership based in Dallas, Texas. We specialize in the gathering and processing, contract compression, contract treating, transportation, fractionation and storage of natural gas and natural gas liquids. Regency offers a full suite of services to producers in several of the most prolific shale plays and rich gas formations in the United States including the Haynesville, Eagle Ford, Barnett, Fayetteville, and Marcellus shales as well as the Permian Delaware basin.

Services:

At the heart of the midstream natural gas industry, Regency offers comprehensive midstream services which provide the critical link between the wellheads and end-user markets for producers. Our goal is to provide superior services every step of the way. Regency's assets are located in some of the most prolific natural gas producing regions in the United States, including the Haynesville, Eagle Ford, Barnett, Fayetteville and Marcellus shales, as well as the Permian Delaware Basin in west Texas.

Since our IPO in 2006, we have evolved from primarily a gathering and processing company into a broadly diversified midstream leader.

Today, our midstream value chain consists of a full range of midstream services; including:

- Natural Gas Gathering and Processing
- Contract Compression Services
- Contract Treating Services
- Natural Gas Interstate and Intrastate Transportation
- Natural Gas Liquids Transportation
- Natural Gas Liquids Fractionation
- Natural Gas Liquids Storage

This range of service offerings, combined with our presence across multiple top gas-producing formations, gives Regency an advantage over less diversified peers.

Corporate:

Regency Energy Partners LP, (NYSE: "RGP") is a Master Limited Partnership based in Dallas, Texas. We specialize in the gathering and processing, contract compression, contract treating, transportation, fractionation and storage of natural gas and natural gas liquids. Regency's assets include a 49.99% ownership interest in the Haynesville Joint Venture, a 50% interest in the Midcontinent Express Pipeline, and a 30% interest in Lone Star NGL LLC, an NGL storage, fractionation and transportation business.

Our assets are primarily located in Louisiana, Texas, Arkansas, Pennsylvania, Mississippi, Alabama and the mid-continent region of the United States, which includes Kansas, Colorado and Oklahoma.
